TECHNICAL DATA SHEET

PRODUCT DESCRIPTION:-

Nerovak Liquid wax shiner highly prized for its ease of application and versatile protective qualities. It is a special solvent based single component wax specific for the stone & marble floor protective polishing. It spreads smoothly to create thin, even coats without the heavy elbow grease required for paste wax, while delivering a deep, glossy shine and strong water repellent barrier against environmental elements. It is primarily used to restore shine, remove minor surface defects and provide a protective water repellent layer to painted, metallic and plastic surfaces. It is favored for its ease of application and quick curing time for marble, granite and terrazzo etc..

KEY ADVANTAGES:-

- 1) Enhanced Gloss & Depth :- Especially with natural carnauba waxes, it provides a warm, reflective shine that makes paint color (likes red & black) pop.
- 2) Hydrophobic Water Beading :- Wax repels water, causing it to bead up and roll off. This helps prevent rain spots and makes drying the stone & marble much easier.
- 3) UV & Contaminant Protection:- It acts as a barrier, shielding your clear coat from the intense sun (which causes fading).
- 4) Scratch Prevention:- The slick surface prevents light towel marks or minor brush scratches from reaching the actual gloss.

SURFACE PREPARATION:-

Make sure surface is clean and completely dry. The presence of water, dust or dirty matter may affect the result. Spread wax uniformly on surface using a clean sponge or cloth. Let the wax completely dry and clean with a clean cloth. If wax is not dry it will not shine after removal. Remove any excess wax immediately. We suggest testing this on a small hidden area before use. Just apply it lightly to the stone and allow it to dry to a haze then buff off with fine steel wool or a white fiber buff pad to get a super high gloss finish.

SHELF LIFE & STORAGE:-

NEROVAK Liquid wax shiner typically has a **shelf life of 24 months** under optimal, climate controlled conditions when stored unopened in its original container from date of manufacturing. Keep away from sunlight exposure.
